

# Writing Practice: Hardware

## About This Activity

### Introduction

In this activity, learners will practice their handwriting and spelling skills using the new hardware vocabulary they learned in the previous activities in this sequence. First, they will learn how to spell and write one of the new words. Then, they will complete a sentence using the word. There are 20 variations of the activity—one for each word.

### Objective

Upon completion of this activity, learners will:

- know how to spell and write the new hardware vocabulary they have been learning

## What You Need

This activity requires a low level of facilitator participation.

Each practice sheet will take about 10 minutes to complete.

You will need the following supplies:

- Pencil

## Facilitator's Instructions

1. Print out the Learner's Sheet pages.
2. Gather your supplies.
3. Give your learner one of the writing practice sheets.
4. Tell your learner about this activity: "Today, you're going to practice your handwriting and spelling! On this sheet, you will practice writing one of the new hardware words you have learned. Then, you will complete a sentence using the word."

# Writing Practice: Hardware

## Standards Addressed

### CSTA

1A-CS-02, Computing Systems, Hardware and Software: Use appropriate terminology in identifying and describing the function of common physical components of computing systems (hardware).

### Common Core

**RF.K.1d:** Recognize and name all upper- and lowercase letters of the alphabet.

**L.K.1a:** Print many upper- and lowercase letters.

**L.K.1f:** Produce and expand complete sentences in shared language activities.

**L.1.1a:** Print all upper- and lowercase letters.

**L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
